PPQD-MAIL	Muhammad Iqbal Karimi	0093 (0) 796 147786	iqbal.karimi@mail.gov.af

Summary: Any disease condition from the field will be reported by the field staff to their respective focal points. The disease report (disease history, pictures and/or plant sample) will be sent to PBTL by the focal point along with their own suggestion/opinion. PBTL will try to investigate and identify the disease/issue and return to focal point along with recommendation for control and eradication of pest and disease. The focal point will share the same information with their respective field staff and will follow the implementation of recommended measures by PBTL for the identified pest and disease.
